For Windows 7 computers (for Windows 8, see page 2):

1. Click on the Start orb, then right click on Computer and select Properties:

Remote Desktop Connection	
Lync 2013	Jon Roenick
C vSphere	Favorites
I ADUC	Computer Open
Remotes	Network Manage Man petwork drive
Word 2013	Control Panel Disconnect network drive
Notepad++	Devices and Printe
	Administrative Te Kename
	Run
Excel 2013	
Citrix Receiver	
Dw Dreamweavr	
DNS	
CamStudio	
All Programs	
Search programs and files	P Log off ►

2. Under the System section, look for the System type. In the sample below, this is a 32-bit version of Windows.

Â	Control Panel Home	View basic information about your computer	
9	Device Manager	Windows edition	
6	Remote settings	Windows 7 Professional	
0	System protection	Copyright © 2009 Microsoft Corporation. All rights reserved.	
V	Advanced system settings	Service Pack 1	
		Kating: 4,3 Windows Experience Index	
		Processor: Intel(R) Core(TM) i7-2600 CPU @ 3.40 GHz 3.40 GHz	
		Testelled memory (PAN/) 400 CP (2.24 CP weekle)	
		System type: 32-bit Operating System	
		Pen and Touch: No Pen or Touch Input is available for this Display	

## For Windows 8 computers:

1. Move the mouse to the bottom right corner to display the Charm bar, click on Settings

2. Click on PC Info

3. Under the System section, look for the System type. In the sample below, this is a 64-bit version of Windows
